

Tito Bacarese-Hamilton

Tito Bacarese-Hamilton is currently Vice President, R & D for Blood Glucose Monitoring (BGM) in LifeScan, a Johnson & Johnson franchise. In his role, Tito has global responsibility for the full-scale development and commercial launch of all new product platforms. He provides the leadership and development direction globally across R&D and is the prime interface with manufacturing operations for the production scale-up of new, multi-product sensing platforms that are critical to LifeScan's strategic growth objectives and the needs of our customers.

Tito graduated from King's College, London and earned his PhD at the Royal Postgraduate Medical Centre in London. He is a Fellow of the American National Association of Clinical Biochemistry and has published more than 50 peer-reviewed articles on a variety of topics related to pathology, oncology and laboratory medicine; he also holds various patents relating to diagnostics.

Tito brings more than 25 years of research and industrial experience in the medical and life sciences areas. He has a broad-based background in medical research and diagnostic product development, biotechnology, drug development programs and general management. He is an acknowledged expert in the field of in vitro diagnostics and has launched numerous products in many clinical fields.

Most recently, Tito was CEO and co-founder of Microtest Matrices Ltd, a protein chip company. Prior to this role, he held senior R & D positions at Ares-Serono and Amersham International.
